

LY SEN DUNG

FRONT-END DEVELOPER

OBJECTIVE

Dedicated and skilled Next.js developer with 2 years of experience seeking a middle-level position to contribute expertise in building efficient and scalable web applications using Next.js.

Experienced Next.js developer proficient in leveraging the framework's features to develop dynamic and responsive web applications. Demonstrated ability to collaborate with cross-functional teams to deliver high-quality solutions. Strong problem-solving skills and a passion for staying updated with the latest web development trends.

EDUCATION

COMPUTER PROGRAMMING 2015 - 2018

FPT POLYTECHNIC (HCMC, VietNam)
Advanced Diploma

COMPUTER ENGINEERING TECHNOLOGY 2018 - 2023

HUMBER COLLEGE (Toronto, Canada)
Advanced Diploma

PROJECT

Environmental Data Visualization Platform 2023 - 2024 (Martinrea Industrial)

Position - React.js Front-end Web Developer
Design and develop for the company website 

Technology description

- Utilized React.js and Next.js for scalable front-end development, employing SSR and SSG for enhanced performance.
- Managed state with Redux or React Context API, styled components with SASS or styled-components, and integrated third-party APIs.
- Implemented responsive design, client-side routing, and serverless functions for dynamic content, ensuring seamless user experiences.
- Conducted automated testing with Jest and React Testing Library, documented codebase, and stayed updated on React.js and Next.js advancements.
- Collaborated with UI/UX designers to implement design systems and maintain consistency across the platform's interface.

JUSTMC MUSIC 2023 - 2024 (Freelance)

Position - Front-End Developer

Technology description

- Engineered a Spotify replica with React, Tailwind CSS, and JavaScript, hosted on Netlify, showcasing proficiency in modern web development tools.
- Acquired API integration skills, utilizing RAPID API for music data retrieval and playback, mirroring Spotify's functionality.
- Mastered search and discovery algorithms, implementing location-based recommendations for an enhanced user experience.

JUSTMC STORE 2024 - Now (Freelance)

Position - Front-End Developer

Design and developer full-stack for an E-commerce Website.

Technology description

- Spearheaded the development of the Just-Mc Store website utilizing the NEXT.js framework, enhancing its performance and scalability.
- Utilized Tailwind CSS for additional styling and customization, ensuring a seamless integration with "shadcn" components.
- Integrated "Nodemailer" to send verification emails for user registration and account management, enhancing user experience and security.
- Developed a digital shop website using Next.js with "tRPC" for typed RPC communication between the client and server.
- Utilized Stripe for payment processing, ensuring secure and seamless transactions within the e-commerce platform.
- Implemented middleware for routing permission, ensuring authenticated users access authorized pages only, enhancing security and user experience.
- Leveraged Express.js to handle server-side operations, including routing, middleware, and API endpoint handling.
- Leveraged tRPC's automatic TypeScript typings for API endpoints, ensuring type safety throughout the application.
- Working with MongoDB database to store data, for authentication, products, users, order
- Used payload CMS to interacted with MongoDB, update, login, edit, delete, payload support more type to work with website.
- Leveraged tRPC's automatic TypeScript typings for API endpoints, ensuring type safety throughout the application.
- Create store wallet by let user can, topup with banks system, worked through telegram Bot.
- Used payment-master service to check-up coming balance from banks, and with webhooks to connect Server API (back-end) to front-end.
- Technologies used in project: tRPC, payload-cms, Tail-wind, payment-master, telegram bot, Docker, stripe, nodemailer, hostinger, NEXTJS, shadcn GUI library
